BOOKING WEBSITE

Technologies

React

React.js is a popular JavaScript library for building user interfaces. It was developed by Facebook and is used by many companies and developers to create fast and interactive web applications.

Node.js

Node.js is a JavaScript runtime built on Chrome's V8 JavaScript engine. It allows developers to run JavaScript on the server-side, outside of a web browser.

Express

Express is a popular web application framework for Node.js. It provides a set of features and middleware functions that make it easy to build robust and scalable web applications and APIs.

MongoDb

MongoDB is a popular NoSQL database that stores data in flexible, JSON-like documents. It is commonly used with Node.js and Express to build scalable web applications and APIs.

SIMPLE UI DESIGN

The image shows a travel booking website with a tropical resort background. At the top, there is a navigation bar with links to Home, Services, Blog, and Contact. A large, bold text "Hey Buddy! where are you Flying to?" is centered on the page. Below this, there is a call-to-action button labeled "Explore Now →". A search form is overlaid on the image, containing fields for "Destination" (labeled "Where are you going"), "Date" (labeled "07/04/2023 to 07/04/2023"), and "Number Of Person" (labeled "1 adult . 0 children . 1 room"). A "Search Hotels →" button is located at the bottom right of the form. A large, stylized arrow points from the text "SIMPLE UI DESIGN" towards the search form.
